

CLAIMS

I Claim:

1. A jack accessory assembly, comprising:

5 a lift column;

a lift-column socket adapted to fit the lift-column; and

a tongue adapted to fit in the lift-column socket.

10 2. The jack accessory of claim 1 wherein the lift-column socket is secured about the lift column.

15 3. The jack accessory of claim 1 wherein the tongue is disposed in the lift-column socket.

4. The jack accessory of claim 1 wherein the lift column comprises a rectangular tube having a plurality of catching means thereon.

5. The jack accessory of claim 1 wherein the lift column is adapted to fit about a jack stem and rest on a jack runner.

6. The jack accessory of claim 4 wherein the catching means comprises teeth.

7. A lift-column socket, comprising:

a rectangular tube having a first side adapted to receive support from a catching means, a front directly opposite the first side, a right side, and a left side; and

a first flange-catch coupled to the front, the first flange-catch for supporting a flange of a tongue.

8. The lift-column socket of claim 7 wherein the first side consist of a support bar coupled between the left side and the right side.

9. The lift-column socket of claim 7 further comprising a second flange-catch coupled to the right side.

10. The lift-column socket of claim 7 further comprising a third flange-catch coupled to the left side.

11. The lift-column socket of claim 7 further comprising a catch-hole in the front.

12. The lift-column socket of claim 7 further comprising a tongue disposed in the first flange-catch.

13. A tongue for a jack accessory, comprising:

a flange adapted to be received by a lift-column socket; and

a support base rigidly coupled to the flange.

5

14. The tongue of claim 13 further comprising a catch disposed in the flange, the catch adapted to be received by a catch-hole of a lift-column socket.

10

15. The tongue of claim 13 wherein the support base is a rectangular tube.

16. The tongue of claim 14 wherein the catch is spring-loaded.

17. The jack accessory assembly of claim 1 further comprising a pipe-support coupled to the lift column.

18. The jack accessory of claim 1 wherein the tongue is rigidly coupled to the socket.

20

19. The tongue of claim 13 further comprising a lift-column socket rigidly coupled to the flange.

20. The jack accessory of claim 1 further comprising a jack stem disposed in the lift-column.
